OUR SERVICES

SOURCING ACTIVITIES

Finding a new potential supplier is not an easy job, Internet sourcing helps but sometimes behind a web page there is nothing: a fake company or simply a trader.

We are here locally with our Chinese speaking Purchasing & Technical Staff, starting from your request (technical drawing or sample), we will perform:

- Sourcing potential supplier
- Product quality analysis
- Supplier reliability analysis
- Price analysis

QUALITY CONTROL ACTIVITIES

By experience we know that often supplies from China have not constant quality, goods of one shipment may be different or lower quality respect the previous one.

We have dedicated Chinese speaking Technical Engineers and we may:

- Certification Check: does the product have a real (CE, UL, CSA, EMC, ROHS, etc.) certification?
- Keep under control your suppliers with periodical visits
- Improve your products by explaining in Chinese language your “hints” to your supplier
- Prepare a quality report before any shipment

LOGISTIC ACTIVITIES

Sometimes is not easy to collect goods from many suppliers and prepare a container, we may:

- Collect all your goods from several suppliers
- Check container loading sending you a report
- Organise shipment for you:
 - FCL: Full container of one product only
 - FCL (consolidated): Full container with goods of several suppliers
 - LCL (for small quantities): Arrange the shipments through your or our appointed forwarding agent.

DESIGNING ACTIVITIES

Personalized packaging with your company logo, company codes, bar-code, which will diversify your company from your competitors.

Our Design Department may customise your packaging according to your wishes, with different styles of packaging, boxes, user manuals, etc.
